How the railroads sorted customers in the 1800’s: “*It is not because of the few thousand francs which would have to be spent to put a roof over the third-class carriage or to upholster the third-class seats that some company or other has open carriages with wooden benches ... What the company is trying to do is prevent the passengers who can pay the second-class fare from traveling third class; it hits the*

poor, not because it wants to hurt them, but to frighten the rich ... And it is again for the same reason that the companies, having proved almost cruel to the third-class passengers and mean to the second-class ones, become lavish in dealing with first-class customers. Having refused the poor what is necessary, they give the rich what is superfluous.”

How airlines sort customers today: “The Basic Economy Blackout,” *WSJ*, 4/5/18:

Individual assignment (just for fun): go to <http://disneyworld.disney.go.com/wdw/index> and check out Disney World’s pricing strategy for its theme parks, resort hotels, special events, etc. Also visit your favorite airline’s web site, e.g. <http://www.delta.com/home/index.jsp>, and analyze pricing for air travel and vacation packages. Then think of other creative pricing strategies that you have encountered whereby firms with market power sort customers according to their willingness to pay and then extract as much money from each one as possible.
